Co-author Professor Nicola Gray, from Swansea University, said: "This shows that the hyper-response of the pupil is in response to any arousing stimulus, and not just threatening ones. "This may allow us to use these positive pictures in therapy, rather than relying upon negative images that can be quite upsetting to the patient, and therefore make therapy more acceptable and bearable.

Like other parts of the physical exam, it begins with inspection, and then proceeds to palpation. It requires the use of several special instruments in order to inspect the eyes and ears, and special techniques to assess their special sensory function. This module reviews some of the relevant surface anatomy and describes the basic HEENT exam.
