### **Kids' Book Review: Review: Flight of the Honey Bee**

Bees are flying insects closely related to wasps and ants, known for their role in pollination and, in the case of the best-known bee species, the western honey bee, for producing honey. Bees are a monophyletic lineage within the superfamily Apoidea. They are presently considered a clade, called Anthophila. There are over 16,000 known species of bees in seven recognized biological families.

### **Bee - Wikipedia**

Honey Bee Flight. Honey bees have 4 wings – a larger pair of forewings and a pair of hind wings. Small hooks called “hamuli” make it possible for the bee to hook the wings on each side together. When the two wings are joined, they flap together giving the bee more lift capacity.
