Women cannot become men's social equals until the most talented women can aspire as realistically as their male counterparts to contribute in proportion to their talents. Thus, the overlap of family, economy, and gender, reshaped by continuing technological change, continues to affect women's status.

## **A theory of family, economy, and gender**

With survey data, the study examines gender as a conditional variable in the effects of family satisfaction and economic strain on psychological well-being among married people. Analysis supports the hypothesis that the positive effect of family satisfaction is greater among women than among men.

The Institute for Gender and the Economy operates on the traditional land of the Huron-Wendat, the Seneca, and most recently, the Mississaugas of the New Credit. Today, this meeting place is still home to many Indigenous people from across Turtle Island and we are grateful to have the opportunity to work on this land.

## **Rotman | Gender and the Economy**

Gender disparities in access to economic resources, including credit, land and economic power-sharing, directly affect women's potential for achieving the kind of economic autonomy they need to provide a better quality of life for themselves and their dependants. 5 Limited access to agricultural inputs, especially for food crops, severely curtails women's potential productivity.

## **CHAPTER II. THE GENDER PERSPECTIVE**

As the market revolution thrust workers into new systems of production, it redefined gender roles. The market integrated families into a new cash economy, and as Americans purchased more goods in stores and produced fewer at home, the activities of the domestic sphere—the idealized realm of women and children—increasingly signified a family's class status.

...

Feminist economics argue that gender and race must be considered in economic analysis. Amartya Sen argues that "the systematically inferior position of women inside and outside the household in many societies points to the necessity of treating gender as a force of its own in development analysis."

## **Feminist economics - Wikipedia**

Gender equality is good for the economy. Every day that we fail to deliver gender equality, we pay the price. Australia's GDP would increase by 11% if the gender employment gap was closed. The Australian economy would gain \$8 billion if women transitioned from tertiary education into the workforce at the same rate as men.

of family disadvantage among minority populations can partly explain the larger gender gaps in educational outcomes we observe among minorities. In quantifying the contribution of family disadvantage to the gender gap in behavioral and academic outcomes, we face two principal obstacles: suitable data and a credible empirical strategy.
