Intermittent engine light | Harley Davidson Forums

Code P0122 is triggered when your vehicle's Engine Control Module (ECM) detects that your Throttle Position Sensor (TPS) circuit A is reporting an output voltage that is below its expected voltage. Depending on your vehicle, your TPS lower output voltage limit should be around .17 to .20 volts, and if the ECM detects that it has dipped below that, then it will trigger Code P0122.

The steps you outlined previously show "no codes" even though the check engine light indicates that there are old codes stored. ... V-Twin Harley Davidson forum. Discussion on V-Twin Harley Davidson motorcycles including Dyna, Electra Glide, Softail, Sportster, and more.

check engine light codes for 2003 softail | V-Twin Forum

The check engine and temp lights come on after a few miles. I checked the codes and got codes P1019 and U0184. I also checked the fans come one when I test them but when needed. I changed the temp sensors in the head and radiator in the left lower fairing. The U0184 code went away but the light still comes on and I still get code P1019. Reply
