This article aims to give an overview of how the field of knowledge

management may be applied to academic libraries. In an article published 15 years ago by Charles T. Townley, Knowledge

Management and Academic Libraries (Townley, 2001), the author states that libraries do not manage knowledge as

information. Librarians  
are information  
workers, and it is  
therefore likely that  
knowledge  
management could  
and should be applied  
in academic libraries.

The early academic libraries built small collections that emphasized the same subjects being taught.

Managing the early college library was simple, with one person—mostly the college president who was also the college librarian, and a teaching faculty. As college education extended beyond the
