### Making Things See : 3D Vision with Kinect, Processing ...

Making Things See--New from O'Reilly Media: 3D vision with Kinect, Processing, Arduino, and MakerBot Sebastopol, CA —This detailed, hands-on guide provides the technical and conceptual information you need to build cool applications with Microsoft's Kinect, the amazing motion-sensing device that enables computers to see.

### Making Things See--New from O'Reilly Media: 3D vision with ...

If you use normal regular ol' viewing to look at 3D images in our 3D Art Gallery, nothing will pop out. You won't see 3D! With the parallel viewing method (a.k.a. the divergence or Magic Eye method), the lines of sight of your eyes move outward toward parallel and meet in the distance at a point well behind and beyond the image.

### "How to See 3D: Magic Eye 3D and more"

When it comes to seeing in 3-D, two eyes are better than one. To see how 3-D vision works, hold a finger at arm's length and look at it through one eye, then through the other. See how the image...

### Why Do We See in 3D? | Live Science

The most common reasons for stereo-blindness are: Medical disorders that prevent the eyes focusing and/or aligning correctly (e.g. amblyopia, strabismus, optic nerve hypoplasia). Loss of vision in one eye. If you are able to see the 3D effect but it causes you discomfort, you may have a mild binocular disorder.

Find helpful customer reviews and review ratings for Making Things See: 3D vision with Kinect, Processing, Arduino, and MakerBot (Make: Books) at Amazon.com. Read honest and unbiased product reviews from our users.

### Amazon.com: Customer reviews: Making Things See: 3D vision ...

Night blindness: It's hard to see objects in dim light. Cataracts : Because they develop slowly, your first symptom may be trouble with the vision test for your driver's license renewal.

### Vision Problems: Symptoms of Common Types of Vision Impairment

Stereoscopic vision works most effectively for distances up to 18 feet. Beyond this distance, your brain starts using relative size and motion to determine depth. 3D stereoscopic imaging is as simple as producing two slightly different images - the same as your eyes would produce - and then showing each eye only one of those images.

### How Do I See Depth?

Get this from a library! Making things see : 3D vision with Kinect, Processing, Arduino, and MakerBot. [Greg Borenstein] -- This detailed, hands-on guide provides the technical and conceptual information you need to build cool applications with Microsoft's Kinect, the amazing motion-sensing device that enables computers ...

### Making things see : 3D vision with Kinect, Processing ...

Seeing in 3-D provides a fundamentally different way of seeing and interpreting the world than seeing with one eye. When I began to see in stereo, it came as an enormous surprise and a great gift.
