PeopleSoft Application Engine provides a daemon process, called PSDAEMON, that runs continuously when PeopleSoft Process Scheduler is running, and is intended for recurring jobs. It polls the system, checking for certain conditions to occur.

Understanding PeopleSoft Application Engine

The PeopleSoft Process Scheduler provides access to the message log. The message log is part of the PROCESSMONITOR component - it is defined in the page object PMN_BAT_MSGLOG . You can use log message actions in application engine programs to write to the message log - essentially the PS_MESSAGE_LOG table behind the scenes.
