DESIGN GUIDE for NARROW WALL BRACING UNITS Procedure 1. For the wall height and width, select the type of bracing panel you want from one of three types: Type SW1 - Single Pryda Strapbrace (SB103 - 30x1.0) for low bracing capacities Type SW2 - Single Pryda Speedbrace (SDB) or Strapbrace (SB123 - 32x1.2) for normal bracing capacities.

Design Guide Narrow Wall Bracing Units

Pryda resources include design guides and manuals to help make sure you install safely, but also ensure compliant connections.

Resources - Pryda

Pryda floor trusses are braced laterally at the top chord level by the flooring material and at the bottom chord level by the ceiling lining. If there is no ceiling fixed directly (or by battens) then enable strongbacks to act as binders by fixing with screws. See section on stronbacks on page 14 for details. BRACING WALLS SUPPORTED BY CANTILEVER
